

Homepage Contact (Friction-Point Quiz) — GHL Build Guide

Generated: April 2, 2026

Location: Paradigm Consulting (toKhUkB5BEHB9Jn52ktG)

STEP 1 — CREATE CUSTOM FIELDS

Create these custom fields in GHL under Settings > Custom Fields > Contact:

Field	Key	Type
HP Paradigm Score	contact.hp_paradigm_score	NUMBER
HP Assigned Tier	contact.hp_assigned_tier	TEXT
HP Primary Pillar	contact.hp_primary_pillar	TEXT
HP Compliance Risk	contact.hp_compliance_risk	TEXT
HP Marketing Risk	contact.hp_marketing_risk	TEXT
HP Business Stage	contact.hp_business_stage	TEXT
HP Hard Tier 3	contact.hp_hard_tier3	TEXT
HP Subscriptions	contact.hp_subscriptions	TEXT
HP Lead Source	contact.hp_lead_source	TEXT
HP UTM Source	contact.hp_utm_source	TEXT
HP UTM Medium	contact.hp_utm_medium	TEXT
HP UTM Campaign	contact.hp_utm_campaign	TEXT
HP Submitted At	contact.hp_submitted_at	DATE

Notes:

- hp_assigned_tier stores "1", "2", or "3" as text. Tier 1 = Compliance-focused, Tier 2 = Culture-focused, Tier 3 = Technology/Systems-focused.
 - hp_primary_pillar stores "1", "2", "3", or "null". 1 = Compliance, 2 = Culture, 3 = Technology.
 - Boolean fields (hp_compliance_risk, hp_marketing_risk, hp_hard_tier3, hp_subscriptions) store "true" or "false" as text.
-

STEP 2 — CREATE TAGS

Tag

homepage-lead

tier-1-compliance

tier-2-culture

tier-3-technology

Pre-existing tags (already in system):

- applied-3x3os
- email-sequence-active

- sequence-completed

STEP 3 — CREATE WEBHOOK TRIGGER

1. Go to Automation > Workflows > Create Workflow
 2. Name: "Homepage Contact"
 3. Set trigger: Inbound Webhook
 4. Copy the trigger ID from the webhook URL
 5. Add trigger ID to Netlify env var: WEBHOOK_INDEX
-

STEP 4 — WEBHOOK PAYLOAD REFERENCE

The site sends one webhook payload through /api/webhook with source homepage-contact.

```
{
  "first_name": "John",
  "last_name": "Doe",
  "email": "john@example.com",
  "phone": "555-123-4567",
  "company_name": "Acme Corp",
  "company_url": "(honeypot — if filled, submission is silently rejected)",
  "paradigm_score": 67,
  "assigned_tier": "2",
  "primary_pillar": "3",
  "compliance_risk": true,
  "marketing_risk": false,
  "hard_tier3": false,
  "business_stage": "mid",
  "subscriptions": true,
  "source": "homepage-contact",
  "lead_source": "friction-point-quiz",
  "utm_source": "google",
  "utm_medium": "cpc",
  "utm_campaign": "spring-2026"
}
```

Field definitions:

Field	Values	Meaning
paradigm_score	0-100 (number)	Overall friction-point quiz score
assigned_tier	"1", "2", "3"	1 = Compliance, 2 = Culture, 3 = Technology
primary_pillar	"1", "2", "3", or null	Dominant pillar from quiz answers
compliance_risk	true / false	Quiz flagged compliance exposure
marketing_risk	true / false	Quiz flagged marketing exposure
hard_tier3	true / false	Strong technology/systems signal — hard-routed to Tier 3
business_stage	"early", "mid", "scale", or null	Self-reported business stage
subscriptions	true / false	Opted into email communications

WORKFLOW 1 — Homepage Contact (Intake and Routing)

Name: Homepage Contact

Status: Publish when complete

Trigger: Inbound Webhook (from Step 3)

Step 1 — Create or Update Contact

Map from webhook payload:

- first_name → First Name
- last_name → Last Name
- email → Email
- phone → Phone
- company_name → Company Name
- paradigm_score → HP Paradigm Score
- assigned_tier → HP Assigned Tier
- primary_pillar → HP Primary Pillar
- compliance_risk → HP Compliance Risk
- marketing_risk → HP Marketing Risk
- hard_tier3 → HP Hard Tier 3
- business_stage → HP Business Stage
- subscriptions → HP Subscriptions
- lead_source → HP Lead Source
- utm_source → HP UTM Source
- utm_medium → HP UTM Medium
- utm_campaign → HP UTM Campaign
- (set HP Submitted At to current date/time)

Duplicate rule: Update existing contact if email matches.

Step 2 — Add to Pipeline

- Pipeline: Paradigm Leads
- Stage: New Lead
- Only if contact is NOT already at a higher stage (position > 0)

Step 3 — Add Tag

- Tag: homepage-lead

Step 4 — Tier Tagging (If/Else Branches)

Branch A — IF hp_assigned_tier = "1":

- Add tag: tier-1-compliance

Branch B — ELSE IF hp_assigned_tier = "2":

- Add tag: tier-2-culture

Branch C — ELSE (hp_assigned_tier = "3"):

- Add tag: tier-3-technology

Step 5 — Route to Email Sequence (If/Else Branches)

- IF hp_assigned_tier = "1" → Enroll in workflow "HP — Tier 1 Compliance Sequence"
- ELSE IF hp_assigned_tier = "2" → Enroll in workflow "HP — Tier 2 Culture Sequence"
- ELSE → Enroll in workflow "HP — Tier 3 Technology Sequence"

After enrollment (all branches):

- Add tag: email-sequence-active

Step 6 — Internal Notification Email

To: jay@paradigmconsulting.co

Subject: New Homepage Lead — {{contact.first_name}} {{contact.last_name}} — Tier {{contact.hp_assigned_tier}} — Score {{contact.hp_paradigm_score}}

Body:

HOMEPAGE CONTACT — FRICTION-POINT QUIZ

Name: {{contact.first_name}} {{contact.last_name}}

Email: {{contact.email}}

Phone: {{contact.phone}}

Company: {{contact.company_name}}

Paradigm Score: {{contact.hp_paradigm_score}} / 100

Assigned Tier: {{contact.hp_assigned_tier}}

Primary Pillar: {{contact.hp_primary_pillar}}

Business Stage: {{contact.hp_business_stage}}

Compliance Risk: {{contact.hp_compliance_risk}}

Marketing Risk: {{contact.hp_marketing_risk}}

Hard Tier 3: {{contact.hp_hard_tier3}}

Subscriptions: {{contact.hp_subscriptions}}

Lead Source: {{contact.hp_lead_source}}

UTM Source: {{contact.hp_utm_source}}

UTM Medium: {{contact.hp_utm_medium}}

UTM Campaign: {{contact.hp_utm_campaign}}

Submitted: {{contact.hp_submitted_at}}

EMAIL SEQUENCES

All sequences share the same structural pattern:

- 5 emails per sequence
- From: Matt I Founder, Paradigm Consulting
- Goal Step on each: Contact clicks tracked link tagged "Apply-3x3OS-Link"

- On goal: Add tag applied-3x3os, remove tag email-sequence-active, move pipeline to Application Link Clicked, stop workflow
 - After Email 5: Wait 3 days → Add tag sequence-completed → Remove tag email-sequence-active → If pipeline still at New Lead or Email Sequence Active, move to Nurture - Long Term
-

HP — Tier 1 Compliance Sequence

Framing: This founder's primary friction point is compliance exposure. The business has gaps in contracts, financial controls, documentation, privacy, or HR that create real liability. The message is about installing the compliance infrastructure that eliminates exposure before it becomes a crisis.

Email 1 — Send immediately

Subject: Your friction-point results, {{contact.first_name}}

Preview: Your score flagged compliance as the primary constraint. Here is what that means.

From: Matt I Founder, Paradigm Consulting

Body:

{{contact.first_name}},

You just completed the friction-point quiz on the Paradigm Consulting site.

Your Paradigm Score came back at {{contact.hp_paradigm_score}} out of 100, and the quiz routed you to Tier 1 — Compliance. That means the biggest source of friction in your business right now is not marketing, not technology, not team culture. It is structural exposure in your compliance infrastructure.

That might sound abstract. It is not. Compliance gaps are the things that do not hurt until they do — and when they do, they hurt all at once. Missing contracts, undocumented financial controls, absent privacy policies, incomplete HR documentation. Each one is a liability that compounds silently.

Most founders at your stage know something is off but have not quantified where the gaps actually are. Your quiz results did that quantification for you.

Over the next two weeks I am going to walk you through what compliance infrastructure actually looks like when it is installed correctly — and why it has to come before growth initiatives, not after.

If anything in your results surprised you, reply and tell me. I read every response.

Matt

Subject: The compliance gap most founders ignore

Preview: It is not the obvious one. It is the one that feels like it can wait.

From: Matt I Founder, Paradigm Consulting

Body:

{{contact.first_name}},

Two days ago your friction-point quiz flagged compliance as your primary constraint. I want to talk about the specific gap that causes the most damage — and it is not the one founders expect.

Most founders think their biggest compliance risk is the thing they know they are missing. The contract they have not updated. The privacy policy they copied from a template. The HR documentation they keep meaning to formalize.

Those are real gaps. But the most dangerous gap is the one between what you think is compliant and what actually is. The contract you have — but that does not cover the scenarios your business actually faces. The financial controls you believe exist — but that depend entirely on one person remembering to do them. The documentation you created — but that no one follows because it does not match how work actually gets done.

That gap between perceived compliance and actual compliance is where exposure lives. And it only becomes visible when something goes wrong.

The 3x3OS engagement starts with a compliance audit that maps every gap — not just the missing pieces, but the pieces that exist on paper but fail in practice. Month 1 is entirely focused on installing the infrastructure that closes both kinds of gaps.

Subject: Why compliance before growth is not conservative — it is strategic

Preview: Every growth initiative built on compliance gaps carries hidden costs.

From: Matt | Founder, Paradigm Consulting

Body:

{{contact.first_name}},

There is a pattern I see with almost every founder whose quiz results flag compliance as the primary constraint. They know the gaps exist. They plan to address them. But they prioritize growth first because compliance feels like maintenance, not momentum.

Here is the problem with that sequence: every growth initiative you build on top of compliance gaps inherits those gaps. You scale marketing — and your privacy policy does not cover the data you are now collecting at volume. You hire faster — and your HR documentation cannot support the onboarding load. You sign bigger contracts — and the terms were written for a business half your current size.

Growth does not fix compliance gaps. Growth amplifies them. And the cost of fixing compliance retroactively — after it has been stressed by scale — is three to five times higher than installing it correctly before you grow.

Your Paradigm Score of {{contact.hp_paradigm_score}} reflects a business with meaningful friction in its compliance foundation. That is not a judgment. It is a structural reality that has a structural solution.

The 3x3OS engagement installs that solution in 90 days. Not a compliance audit that sits in a folder. An operational compliance infrastructure that your team actually uses.

Matt

Subject: What a compliance-first 90 days actually looks like

Preview: Not paperwork. Not checklists. Operational infrastructure.

From: Matt I Founder, Paradigm Consulting

Body:

{{contact.first_name}},

I want to be specific about what happens when a founder at your stage goes through the compliance track of the 3x3OS engagement.

Month 1 — Install: We audit every compliance surface in the business. Contracts, financial controls, documented processes, privacy infrastructure, HR documentation. Not just whether they exist, but whether they function under the actual conditions of your business. We build the operational compliance layer — the documentation, decision frameworks, and controls that make compliance automatic rather than dependent on someone remembering.

Month 2 — Integrate: We connect the compliance infrastructure to your daily operations. This is where most compliance efforts fail — they produce documents that nobody uses. Integration means your team's actual workflows include compliance checkpoints that do not create friction. The systems enforce the standards without requiring manual oversight.

Month 3 — Scale: We stress-test the compliance infrastructure against your growth targets. What breaks when you double your client load? What gaps emerge when you add three team members? We identify and close those gaps before they become real exposures.

The result is not a binder of policies. It is a business that can grow without accumulating hidden liability.

I have room for one more compliance-track engagement this quarter.

Subject: Last note on your friction-point results

Preview: The compliance gaps do not resolve themselves.

From: Matt I Founder, Paradigm Consulting

Body:

{{contact.first_name}},

This is my last email about your friction-point quiz results.

Your Paradigm Score was {{contact.hp_paradigm_score}} out of 100. The quiz identified compliance as your primary constraint — the area where structural friction is highest and where unaddressed gaps create the most risk.

Those gaps will not close on their own. They will not close because the business grows. They will compound as the business grows. Every month without compliance infrastructure is a month where exposure accumulates silently.

If you want to close the gaps — not with a checklist but with installed operational infrastructure — the 3x3OS application is below. We review every application personally and only accept founders where the engagement will produce a measurable structural shift.

If the timing is not right, keep your quiz results. The gaps will be the same whenever you are ready to address them.

Matt

HP — Tier 2 Culture Sequence

Framing: This founder's primary friction point is culture and team infrastructure. The business has gaps in how the team operates, communicates, makes decisions, or scales its people systems. The message is about installing the culture infrastructure that turns a founder-dependent team into an operationally independent one.

Email 1 — Send immediately

Subject: Your friction-point results, {{contact.first_name}}

Preview: Your score flagged culture as the primary constraint. Here is what that means.

From: Matt I Founder, Paradigm Consulting

Body:

{{contact.first_name}},

You just completed the friction-point quiz on the Paradigm Consulting site.

Your Paradigm Score came back at {{contact.hp_paradigm_score}} out of 100, and the quiz routed you to Tier 2 — Culture. That means the biggest source of friction in your business right now is not compliance infrastructure or technology. It is how your team operates.

Culture friction shows up in specific, measurable ways: decisions that require your approval when they should not, team members who cannot resolve conflicts without escalation, onboarding that takes twice as long as it should, or a general sense that the business cannot function at full capacity when you step away.

These are not personality problems. They are infrastructure problems. Your team does not lack talent or motivation — it lacks the systems, authority frameworks, and communication infrastructure that allow talent to operate independently.

Over the next two weeks I am going to walk you through what culture infrastructure actually looks like when it is installed — and why it is the single highest-leverage investment for a founder at your stage.

Reply if anything in your results resonated. I read every response.

Subject: The real cost of founder-dependent culture

Preview: It is not burnout. It is the revenue ceiling you cannot see.

From: Matt | Founder, Paradigm Consulting

Body:

{{contact.first_name}},

Two days ago your friction-point quiz flagged culture as your primary constraint. I want to talk about why that matters more than most founders realize.

The visible cost of culture friction is obvious — it is the meetings that should not require you, the decisions that stall when you are unavailable, the general sense that the team needs you more than it should.

The invisible cost is bigger. It is the revenue your business cannot generate because your team's capacity is capped by your personal bandwidth. Every decision that routes through you is a bottleneck. Every process that depends on tribal knowledge instead of documented authority is fragile. Every hire who takes three months to become productive instead of three weeks is compounding waste.

Your Paradigm Score of {{contact.hp_paradigm_score}} reflects a business where the team's operating capacity is constrained by cultural infrastructure — not by talent, not by market opportunity, not by product quality.

The 3x3OS engagement addresses this directly. Month 1 installs the decision authority and communication frameworks. Month 2 integrates them into daily operations. Month 3 scales them to handle your growth targets.

The result is a team that operates at full capacity without requiring the founder in every loop.

Email 3

Subject: Why hiring does not fix culture friction

Preview: More people on a broken operating system just creates more friction.

From: Matt | Founder, Paradigm Consulting

Body:

{{contact.first_name}},

The instinct when culture friction becomes visible is to hire. More people should mean more capacity. A new manager should mean fewer decisions routing to you. A bigger team should mean the founder can step back.

That logic only works if the operating infrastructure supports it. Without clear decision authority, every new hire creates more decisions that need your input, not fewer. Without documented processes, every new team member extends the onboarding burden. Without communication frameworks, a larger team generates more noise, not more signal.

Hiring into culture friction is like adding lanes to a highway that has a broken interchange. More lanes do not fix the bottleneck — they just put more cars in front of it.

The founders who come through the 3x3OS culture track often discover that their team's existing capacity — before any new hires — is thirty to fifty percent higher than what they are currently accessing. The constraint is not headcount. It is the infrastructure that allows headcount to produce output.

Install the infrastructure first. Then hire into a system that can actually absorb new capacity.

Matt

Email 4

Subject: What a culture-first 90 days actually looks like

Preview: Decision authority. Communication frameworks. Operational independence.

From: Matt | Founder, Paradigm Consulting

Body:

{{contact.first_name}},

Here is what the culture track of the 3x3OS engagement looks like in practice.

Month 1 — Install: We map every decision that currently requires the founder and categorize them by type — strategic (should stay with founder), operational (should be delegated with guardrails), and tactical (should be fully autonomous). We build the decision authority documentation that tells every team member exactly what they can decide, what criteria trigger escalation, and what context they need to make the same call you would make.

Month 2 — Integrate: We install the communication and meeting infrastructure that replaces ad-hoc founder access with structured information flow. This includes async communication standards, meeting cadences with clear outputs, conflict resolution frameworks, and accountability systems that do not depend on the founder checking in.

Month 3 — Scale: We stress-test the culture infrastructure against growth. What breaks when you add three people? What decisions still route to you that should not? We close every remaining gap and build the onboarding system that allows new hires to reach full productivity in weeks instead of months.

The output is not a culture deck or a set of values on the wall. It is operational infrastructure that changes how your team works every day.

HP — Tier 3 Technology Sequence

Framing: This founder's primary friction point is technology and systems infrastructure. The business either lacks the systems to operate efficiently, has fragmented tools that do not talk to each other, or is manually doing work that should be automated. The message is about installing the technology layer that turns manual operations into scalable systems.

Email 1 — Send immediately

Subject: Your friction-point results, {{contact.first_name}}

Preview: Your score flagged technology as the primary constraint. Here is what that means.

From: Matt I Founder, Paradigm Consulting

Body:

{{contact.first_name}},

You just completed the friction-point quiz on the Paradigm Consulting site.

Your Paradigm Score came back at {{contact.hp_paradigm_score}} out of 100, and the quiz routed you to Tier 3 — Technology. That means the biggest source of friction in your business right now is not team culture or compliance exposure. It is your systems architecture.

Technology friction is deceptive because it often feels like a people problem. The team is slow because they are manually doing work that should be automated. Information lives in five different places and none of them agree. Client onboarding takes a week because every step requires a human to remember to do the next thing. Reporting takes hours because data has to be pulled from three systems and reconciled in a spreadsheet.

None of that is a people problem. It is a systems problem. Your team is not slow — your infrastructure is.

Over the next two weeks I am going to walk you through what technology infrastructure looks like when it is installed correctly — not as a collection of tools, but as an integrated operating system for your business.

Reply if anything in your results resonated. I read every response.

Matt

Subject: Why more tools make the problem worse

Preview: The issue is not which tools you use. It is how they connect.

From: Matt | Founder, Paradigm Consulting

Body:

{{contact.first_name}},

Two days ago your friction-point quiz flagged technology as your primary constraint. I want to talk about the mistake most founders make when they see that result.

The instinct is to buy more software. A better CRM. A new project management tool. An AI tool that promises to automate everything. The problem is that every new tool you add to a fragmented stack makes the fragmentation worse. You do not need more tools. You need fewer tools that actually talk to each other.

The real cost of a fragmented technology stack is not the subscription fees. It is the human labor spent bridging the gaps between systems — the copy-pasting, the manual data entry, the reconciliation, the "let me check the other system" conversations. That labor is invisible on a P&L but it consumes twenty to forty percent of your team's productive capacity.

Your Paradigm Score of {{contact.hp_paradigm_score}} reflects a business where technology friction is consuming capacity that should be going toward revenue-generating work.

The 3x3OS technology track does not start by recommending tools. It starts by mapping your actual information flow — where data enters, how it moves, where it gets stuck, and where humans are doing work that a connected system should handle automatically. The tool decisions come after the architecture is clear.

Matt

Email 3

Subject: The automation that matters vs. the automation that wastes money

Preview: Not all automation is equal. Most of it is premature.

From: Matt I Founder, Paradigm Consulting

Body:

{{contact.first_name}},

There is a hierarchy to technology installation that most founders skip. They jump straight to automation — "automate this workflow," "automate that notification," "automate the reporting." And then they wonder why the automation creates as many problems as it solves.

Automation built on top of fragmented systems automates the fragmentation. You get faster data moving between disconnected tools, which means errors propagate faster, inconsistencies multiply faster, and debugging becomes harder because the automation obscures what is actually happening.

The correct sequence is: consolidate, then connect, then automate.

Consolidate means reducing the number of systems that hold the same type of data. Connect means building reliable data flow between the systems that remain. Automate means removing human steps from workflows that now have clean, connected data flowing through them.

When founders come through the 3x3OS technology track, Month 1 is consolidation — mapping every system, eliminating redundancy, and establishing the single source of truth for each data type. Month 2 is connection — building the integrations and data flows that make the remaining systems work as one. Month 3 is automation — and by then, the automation is clean because it is built on a solid foundation.

Skip any step and the automation breaks within sixty days. Follow the sequence and it runs for years.

Subject: What a technology-first 90 days actually looks like

Preview: Consolidate. Connect. Automate. In that order.

From: Matt I Founder, Paradigm Consulting

Body:

{{contact.first_name}},

Here is what the technology track of the 3x3OS engagement looks like in practice.

Month 1 — Install: We run a full system architecture audit. Every tool, every data flow, every manual process. We map where information enters the business, how it moves between systems, and where humans are doing work that should be automated. Then we build the consolidation plan — which systems stay, which get replaced, and what the target architecture looks like. We begin installation of the core stack.

Month 2 — Integrate: We connect the systems. API integrations, webhook automations, data sync pipelines. The goal is zero manual data transfer between systems. Every piece of information that enters the business once should be available everywhere it is needed without someone copying it. We also build the dashboards and reporting infrastructure so you can see what is happening in real time instead of waiting for someone to compile a report.

Month 3 — Scale: We build the automation layer. Client onboarding sequences. Internal workflow triggers. Notification systems. Reporting automations. All built on the clean, connected foundation from Months 1 and 2. We stress-test against your growth targets and ensure the architecture handles two to three times your current volume without breaking.

The result is not a collection of tools. It is an operating system for your business.
