

Compliance Spine Risk Map — GHL Webhook Mapping Reference

paradigmconsulting.io

Page: <https://paradigmconsulting.io/compliance-spine-risk-map> **Location:** Paradigm Consulting (`toKhUkB5BEHB9Jn52ktG`) **Inbound Webhook Trigger URL:** <https://services.leadconnectorhq.com/hooks/toKhUkB5BEHB9Jn52ktG/webhook-trigger/ed7291fc-7f47-4785-8e93-57c0399265b7> **Netlify env var:** `WEBHOOK_COMPLIANCE_SPINE_RISK_MAP` (set)

Use this document while configuring the **Inbound Webhook trigger** and the **Create/Update Contact** action in GHL Workflow 1 (Risk Map Intake).

Sample webhook payload

GHL needs a sample payload to populate the field picker. Either submit a real test from the live form, or paste this JSON into the trigger's "Sample Request" capture:

```
{
  "source": "compliance-spine-risk-map",
  "lead_source": "compliance-spine-risk-map",
  "name": "Test Buyer",
  "firstName": "Test",
  "email": "test@example.com",
  "phone": "+1 555-555-1234",
  "company": "Test Co",
  "product_inquiry": "Compliance Spine Risk Map",
  "offer_price": "$4995"
}
```

Field mapping (Inbound Webhook → Contact)

Webhook field	GHL field	Custom field ID	Notes
<code>firstName</code>	First Name (standard)	—	Use this; takes priority over <code>name</code>
<code>name</code>	Full Name (standard, optional)	—	Fallback if <code>firstName</code> is missing
<code>email</code>	Email (standard)	—	Duplicate-match key (see rule below)
<code>phone</code>	Phone (standard)	—	Already formatted with country code
<code>company</code>	<code>contact.rm_company</code>	<code>HZBntuLGEJXoDS0N0yZK</code>	Text
<code>product_inquiry</code>	<code>contact.rm_product_inquiry</code>	<code>Jm9a29KK0Chl0TuP14cP</code>	Text — always "Compliance Spine Risk Map"
<code>offer_price</code>	<code>contact.rm_offer_price</code>	<code>ZMhNGZZXxylYiYZ2Di3I</code>	Text — always "\$4995"
<i>(workflow time)</i>	<code>contact.rm_submitted_at</code>	<code>5A20grq6oFRt52hDh6rJ</code>	Date — set to workflow runtime
<i>(literal)</i>	<code>contact.rm_stage</code>	<code>6mEQoA9YJheWQh5h46Sj</code>	Text — set to <code>requested</code>

Duplicate-handling rule (Create/Update Contact action)

- Match on: `email`
- If **contact exists**: update Risk Map custom fields, but do **NOT** overwrite First Name or Phone if either is already populated. This preserves prior touch data from other lead-magnet entries.

Tags + pipeline (after contact create/update)

Tag to apply

Tag	ID
compliance-spine-risk-map-lead	1bGv2Nnob2c2WZGH3Jx4

Pipeline + stage

- **Pipeline:** Compliance Spine Risk Map
- **Stage:** Requested

Pipeline-stage safeguard

If the contact already has an opportunity in this pipeline at a later stage (position > 1), **skip the stage move and just refresh the custom fields**. A buyer who resubmits while still in delivery shouldn't get reset back to "Requested."

Lifecycle tag reference (used by Workflows 2 + 3)

These are the other Risk Map tags already created in GHL. Workflow 1 only applies the `-lead` tag; the rest are applied later in the lifecycle.

Tag	ID	Applied when
compliance-spine-risk-map-lead	1bGv2Nnob2c2WZGH3Jx4	Form submitted (Workflow 1, step 2)
compliance-spine-risk-map-booked	0jAoLTZ9mmuubJE1KYRi	Discovery call confirmed (manual or calendar webhook)
compliance-spine-risk-map-paid	RfhNiAMtmjg7ryycivY4	Invoice paid
compliance-spine-risk-map-delivered	(in build doc)	Written risk profile delivered to buyer
compliance-spine-risk-map-converted	(in build doc)	Buyer signs full Compliance Spine engagement
compliance-spine-risk-map-not-converted	(in build doc)	90-day conversion window expires without engagement

Quick smoke test

After Workflow 1 is published, send a real test from <https://paradigmconsulting.io/compliance-spine-risk-map> and verify in GHL:

- [] New contact created (or matched on email if duplicate)
- [] First Name, Email, Phone populated
- [] All 5 `rm_*` custom fields populated correctly
- [] Tag `compliance-spine-risk-map-lead` applied
- [] Opportunity created in pipeline **Compliance Spine Risk Map**, stage **Requested**
- [] Internal alert email arrives at `ari@paradigmconsulting.io` and `jay@paradigmconsulting.io`
- [] Confirmation email arrives at the test buyer's email from `ari@paradigmconsulting.io`
